

Andi Ruda

ENGINEERING LEADER / PLATFORM, INTEGRATIONS & DISTRIBUTED SYSTEMS

Detroit Metropolitan Area | andiruda@gmail.com | andiruda.com | linkedin.com/in/andiruda

EXECUTIVE PROFILE

Hands-on engineering leader with 15+ years building SaaS products, leading technical teams, and modernizing cloud platforms. Currently leads a four-engineer team in a 500+ microservice, multi-tenant AWS environment. Brings people leadership and technical depth to embedded analytics, fintech migrations, serverless architecture, reliability, and automation. Former Director of Development and founder/product builder who turns ambiguous business needs into durable systems and shipped products.

PROFESSIONAL EXPERIENCE

Engineering Manager | Rhythm Software | Aug 2025 - Present

- Lead a team of four engineers with responsibility for delivery, coaching, performance, technical direction, and cross-functional planning.
- Architected and hands-on delivered a secure, multi-tenant Omni BI platform, streaming data from hundreds of DynamoDB tables into a relational analytics layer and adding server-side tenant, user, and application scoping for a planned platform-wide paid add-on.
- Designed and automated a preview-first Stripe and Payrix token migration platform; moved thousands of tokens across 10 tenants using reconciliation, immutable review plans, backups, stale-write protection, monitoring, and human review, with effectively zero customer-visible downtime.
- Guide architecture and operations across a 500+ microservice AWS serverless platform using Lambda, DynamoDB, SNS/SQS, Step Functions, API Gateway, CloudFormation, and CDK.
- Modernized a shared AWS SDK layer from v2 to v3 without forcing consumer rewrites; standardized retries and error handling to improve resilience under throttling and transient failure.
- Partner with the CTO, product leaders, and engineering peers on roadmap sequencing, architecture, delivery risk, budget considerations, and operational reliability.

Senior Software Engineer | Rhythm Software | Jan 2021 - 2025

- Designed and delivered scalable platform applications, APIs, and reusable JavaScript/TypeScript libraries across Angular, Node.js, and AWS.
- Led complex cross-service initiatives from requirements and architecture through rollout, production support, and iterative improvement.

Senior Software Engineer / Technical Lead | BBVA | Nov 2019 - Jan 2021

- Led enterprise software initiatives from planning through delivery in a fast-paced Agile and CI/CD environment.
- Built infrastructure-provisioning automation, supported high-volume data pipelines, and resolved complex system and software failures.

EXPERIENCE, CONTINUED

Director of Development | Dealership Performance CRM | Jul 2015 - Nov 2019

- Led an organization of up to 10 people spanning engineering, QA, and product; supported hiring, training, delegation, and professional growth.
- Owned roadmap planning, architectural direction, engineering delivery, and budget decisions for SaaS platform initiatives.
- Improved delivery processes and cross-functional collaboration while evolving platform capabilities around customer and operational needs.

Team Lead | Dealer Spike | Dec 2011 - Aug 2015

- Managed a four-person senior support team and helped oversee a 10-person support organization, including training new hires and developing team leads.
- Coordinated with engineering, SEO, client relations, launch, and front-end teams to resolve escalations, manage projects, and improve customer outcomes.

FOUNDER & PRODUCT-BUILDER WORK

Ruda Works LLC | Founder & Product Builder

- Building an independent venture studio spanning consumer AI, tabletop gaming, and civic technology through Alottle, Long Rest, CivicPort, and other initiatives.
- Solo-founded and built Time Tales, a full-stack AI educational storytelling SaaS spanning React/TypeScript, AWS Amplify serverless services, cited OpenAI story generation, branching narrative playback, image and audio generation, family workflows, Stripe billing, observability, automated testing, and release operations.

CORE EXPERTISE

Leadership: Team coaching, hiring, performance management, roadmap planning, stakeholder alignment, architecture review, delivery risk, budget awareness, and operational ownership.

Platforms: AWS Lambda, DynamoDB, SNS/SQS, Step Functions, API Gateway, CloudFormation, CDK, Node.js, TypeScript, Angular, React, and CircleCI.

Domains: Multi-tenant SaaS, embedded analytics and Omni BI, Stripe and Payrix integrations, payment migration and reconciliation, SOC 2 environments, reliability, and cloud cost optimization.

Engineering leadership for consequential platforms.
